**Nomenclatural corrections for two genus-group names of Lycaenidae  
(Lepidoptera)**

Zsolt BÁLINT

*Hungarian National Museum Public Collection Centre – Hungarian Natural History Museum,  
Department of Zoology, Lepidoptera Collection, H-1088 Budapest, Baross utca 13, Hungary.*

*E-mail: balint.zsolt@nhmus.hu*

**Abstract** – *Moseralfia* nom. nov. is proposed as a replacement name for *Moseria* Bálint, 2022 (Lepidoptera: Lycaenidae), a junior homonym of four available generic names, of which *Moseria* Ghigi, 1909 (Ctenophora: Pleurobrachiidae) is the oldest and currently valid. *Szentivanya* Bálint, 2022 (Lepidoptera: Lycaenidae) is a junior homonym of *Szentivanya* Kaszab, 1958 (Coleoptera: Tenebrionidae); as it is also a junior objective synonym of *Pseudogyris* Braby et Müller, 2022, no action is needed.

**Key words** – homonym, replacement name, synonym, type species

## INTRODUCTION

The fourth part of the book series “Pillangóvilág” (World Butterflies) (D’ABRERA & BÁLINT 2022) was published on 30 September 2022 (BÁLINT 2022). The volume includes an Appendix with descriptions of several new species-, genus- and family-group names that were mentioned in the main body of the text (BÁLINT 2022). Two genus-group names proposed in the family Lycaenidae turned out to be homonymous; they are corrected in the present short contribution.

## NOMENCLATURAL CORRECTIONS

### *Moseralfia* nom. nov.

*Moseria* Bálint, 2022 (BÁLINT 2022: 97). Type species by original designation: *Thecla celelata* Hewitson, 1874. Junior homonym of *Moseria* Ghigi, 1909 (Ctenophora: Pleurobrachiidae), *Moseria* Weise, 1922 (Coleoptera:

Chrysomelidae), *Moseria* Totton, 1965 (Cnidaria: Resomiidae) and *Moseria* Beer et Nucifora, 1965 (Acari: Tarsonemidae).

*Discussion – Moseria* Bálint, 2022 is a junior homonym of four available generic names; the oldest one of them, *Moseria* Ghigi, 1909 (GHIGI 1909), is currently valid. Accordingly, the replacement name *Moseralfia* nom. nov. is proposed here for *Moseria* Bálint, 2022. Similarly to *Moseria* Bálint, 2022, the replacement name is also dedicated to Alfred Moser (São Leopoldo, Brazil), eminent researcher of Neotropical Lepidoptera.

### *Pseudogyris* Braby et Müller, 2022

*Pseudogyris* Braby et Müller, 2022 (March) (BRABY & MÜLLER 2022: 3).

Type species by original designation: *Ogyris meeki* Rothschild, 1900.

*Szentivanya* Bálint, 2022 (September) (BÁLINT 2022: 99). Type species by original designation: *Ogyris meeki* Rothschild, 1900. Junior homonym of *Szentivanya* Kaszab, 1958 (Coleoptera: Tenebrionidae); junior objective synonym of *Pseudogyris* Braby et Müller, 2022.

*Discussion – Szentivanya* Bálint, 2022 is a junior homonym of *Szentivanya* Kaszab, 1958 (Coleoptera: Tenebrionidae) (KASZAB 1958). As it is also a junior objective synonym of *Pseudogyris* Braby et Müller, 2022 (published on 18 March) (BRABY & MÜLLER 2022), both being based on the same type species, there is no need for a replacement name.
